Release Form

Owner's Name:

Animal's Name:

I am the owner or agent for the owner of the above described animal(s) and have the authority to execute this consent. I hereby consent and authorize the performance of the following procedure(s) or operation(s)

I understand that during the performance of the foregoing procedure(s) or operation(s), unforeseen conditions may be revealed that necessitates an extension of the foregoing procedure(s) or operation(s) or different procedure(s) or operation(s) than those set forth above. Therefore, I hereby consent to and authorize the performance of such procedure(s) or operation(s) as are necessary and desirable in the exercise of the veterinarian's professional judgment.

I authorize the use of appropriate anesthetics, and other medication, and I understand that hospital support personnel will be employed as deemed necessary by the veterinarian.

I have been advised as to the nature of the procedure(s) or operation(s) and the risks involved. I realize that results cannot be guaranteed.

In the case of abandonment, written notice to remove the animal(s) will be mailed to the address on the permanent record. Five days after such written notice, the animal(s) will be considered abandoned and may be disposed of, or destroyed as you deem best, and it is understood that your doing so does not relieve me from paying all costs of your service and the use of your hospital, including the cost of keeping.

I have read and understand this authorization and consent.

TELEPHONE # WHERE OWNER CAN BE REACHED TODAY:

PREANESTHETIC BLOOD PROFILE

Anesthesia is never trivial or routine because each pet can respond differently to medications administered. To diagnose underlying problems and better evaluate the ability of your pet to metabolize the drugs needed, we highly recommend a pre anesthetic blood profile to evaluate the kidneys, liver, blood sugar, total protein and complete blood cell count and differential. The cost is \$75.50. Please indicate your choice and sign.

YES _____ NO _____ Dr.'s Discretion _____

Signature: _____

FLUID TREATMENT

Fluid therapy provides cardiovascular support and kidney support during surgery and anesthesia. It also provides rapid access for medications, should unforeseen problems arise. An intravenous catheter and fluids are recommended for all pets and especially those over the age of 6 years. The cost is \$55.62. Please indicate your choice and sign.

OTHER SERVICES

1. PAIN MANAGEMENT

None of us would deny that animals feel pain. We know it intuitively, and we draw from clinical evidence. Research has shown that 24 hours after a hysterectomy, pets show normal behavior in the presence of human observers, but markedly different behaviors when alone, e.g., constant circling, fatigue, and depression. When given pain relief, pets recover more quickly.

Pre and postoperative pain management is as follows:

Cats/Small Dogs- \$45.29 Med Dogs- \$53.50 Lg Dogs- \$60.00 XL Dogs- \$65.00

YES _____ NO _____

2. ADD ON TEETH CLEANING, POLISHING, AND SEALANTS WITH SURGERY

While your pet is under anesthesia, we can clean and polish teeth. Additional cost is \$64.00- much less than a cleaning by itself. Any necessary extractions etc. will be done at an additional fee.

YES _____ NO _____

3. AKC COMPANION ANIMAL RECOVERY MICROCHIP

Each year millions of pets are lost. Using the AKC CAR system micro chipping and enrolling in their global databases gives you and your pet the best chance to be connected for life. While your pet is under anesthesia we can insert the AKC CAR CHIP. Cost is \$50.00
